Here is a super pro talk radio studio that is small, but functional. There's plenty of room for your guest and you as host with the Graham-Studios "Radio Desk". SmallTALK (TM) features the ARRAKIS small workhorse audio console, the ARC10UP model with a USB channel input for adding audio from a USB device or Laptop. The two line phone hybrid will allow for conferences, but no matter what, you're in control with the Talk-Show digital delay system. Any profanity can be "bleeped out" keeping your show rated "G". SpartaMation is a complete radio station automation system with "Hot Buttons" for instant audio playback of bumper music, theme songs or sound effects. It all comes as a pre-wired studio kit that virtually anyone can install. Furniture custom sized or scaled to room size at no extra charge. Everything is pre-wired at EBS creating our famous "plug and play" studio system. No broadcast engineers are required to re-assemble this studio.
